

MUCH MORE
for packaging lines

A totally digital app
dedicated to maintenance
of packaging lines with
3D manuals, spare parts
catalogue, video tutorials
and online training.

- The IIoT platform at the base of all Goglio services
for an improved efficiency on packaging lines:
- Data Lake structured, analyzed and accessible
in periodic customized reports;
 - 7 days/7, h24 for the management of the packaging lines
with real time data;
 - Integrated Platform at the base of advanced services offered by
Goglio for an improved efficiency and reduce unexpected events;
 - MINDbot is the virtual assistant based on AI for easily
managing the line operating data.

A suite of optional mechanical parts,
installed on packaging lines,
allows to manage the new mono-PE,
mono-PP and polyolefin laminates.

COMPLETE SYSTEM

ultimate packaging solutions

Materials

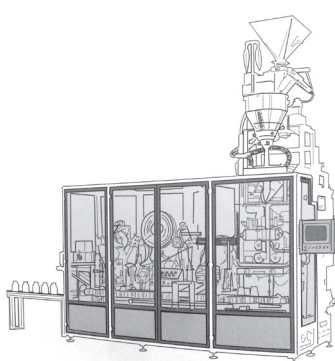

Multilayer high barrier laminates for the packaging of ground coffee, in beans, pods or capsules available in reels or premade bags from few grams up to 3-5 Kg for domestic use, bar and food service. Large formats from 25 kg to liners up to 800 Kg, ideal for coffee preservation and transport.

Valves

The essential accessory for fresh coffee packaging.

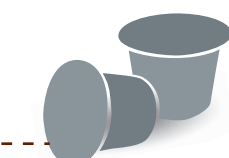

Machines

Packaging lines for coffee: vacuum, atmosphere or in capsules.

Capsules

Capsules and complete range of materials for their top lid.

Technical assistance & service

Thanks to their long tradition, Goglio is today near the customer in every phase of packaging life and process, a partner and unique contact offering the ideal turn-key solution

for every specific need. Goglio's complete system combines high barrier flexible laminates, valves, packaging lines and technical assistance for coffee packaging.

Degassing valves

First created by Goglio, the one-way degassing valves stand out for their high reliability and functionality. Today the range includes different types according to their application technology (heat or ultrasonic), opening/closing valves and air flow. Their composition must fit the material of the sealing laminate: PE, PP or Bio.

Sustainable solutions to bring coffee worldwide

WIDE CHOICE of laminates*

Traditional

WITH ALUMINUM

The traditional high barrier to preserve product against oxygen and moisture.

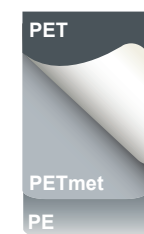

OXYGEN ★★★★★
MOISTURE ●●●●●

METALLIZED

Barrier materials standing out for their best quality/price ratio.
