

The Clear Choice For Packaging

Food

Beverages

Personal / Home Care

Agrochemical

Oil

Pharma

**Global Technology,
Excellent Quality Standards,
Affordable Pricing &
Top-Class Performance**

Your products are important to you, but they are equally important to us.

Your brands are great products. Packaging these products calls for investing in the right solutions that compliment the quality of your product. Increased line efficiency, lower packaging material usage, minimizing rejects & waste, low energy consumption and reduced carbon footprint are important considerations for the packaging solutions we propose.

Every solution we deliver reflects our approach to maximize returns for our customers.

Primary Packaging - Rigid Containers

From standalone machines to integrated lines

Blow Moulder

Depalletizer

Unscrambler

Rinser / Filler / Capper

Labellers

Be it bottles (PET or Glass), cans, jars or any other rigid container, we have proven solutions to feed, clean, fill, close and decorate them.

Our blow moulders are suited for PET containers with and without grip handle.

Various filling technologies are available at our disposal to fill variety of products with high accuracy. Integrated monobloc capper or stand alone cappers complete the filling and capping range.

Decoration of containers with self adhesive or wet glue labels are possible from low to high speed applications.

Primary Packaging - Flexibles

From simple packaging to innovative solutions.

Pouch Filling

Stick Pack

Sachet

Flow Wrapping

Sachets, stick pack and doypack (stand up pouch) are becoming very popular packaging formats in food, personal care, home care & beverages segments.

Our proven and highly reliable solutions for each of this format followed by integrated end of line automation, if required, make it a breeze for our customer to expand existing capacity or build new ones.

Secondary Packaging

Give your product a second skin

Overwrapping Machines

Cartoning Machines

Shrink Wrapping Machines

Overwrap individual or group of products with BOPP film with our overwrapping machines or choose shrink wrapping with polyolefin or LDPE film (usually for multipacks) to provide secondary packaging for your products.

We can carton your products prior to wrapping them as per your needs.

Case Packing & Shrink Wrapping

Cost effective and highly reliable End of Line automation

Case Erectors & Case Sealers

Top Load Case Packers

Side Load Case Packers

Wrap Around Case and Tray Packers

High Speed Shrink Wrappers (Film only, Pad+film or Tray+film)

Automation of end of line packaging process, while desirable, is often compromised due to challenges of ROI. By being cost effective and highly reliable at the same time, our end of line automation solutions help to resolve this dilemma for our customers.

Palletizing

Efficient and Flexible solutions

Case Palletizer

Bag Palletizer

Pallet Stretch Wrapper

Our palletizers are designed to provide flexibility, ergonomcy and operation efficiency to increase productivity of final step of packaging. We provide robotic and layer palletizers in various configurations followed by pallet stretch wrapping to stabilize loads for logistics.

Conveyors & Turnkey Supply

From Concept to Commissioning

Line Layout Design

Equipment Supply

Electrical and Mechanical Integration

Installation and Commissioning

Training and Documentation

Complete Project Management

Efficiency Improvement Solutions

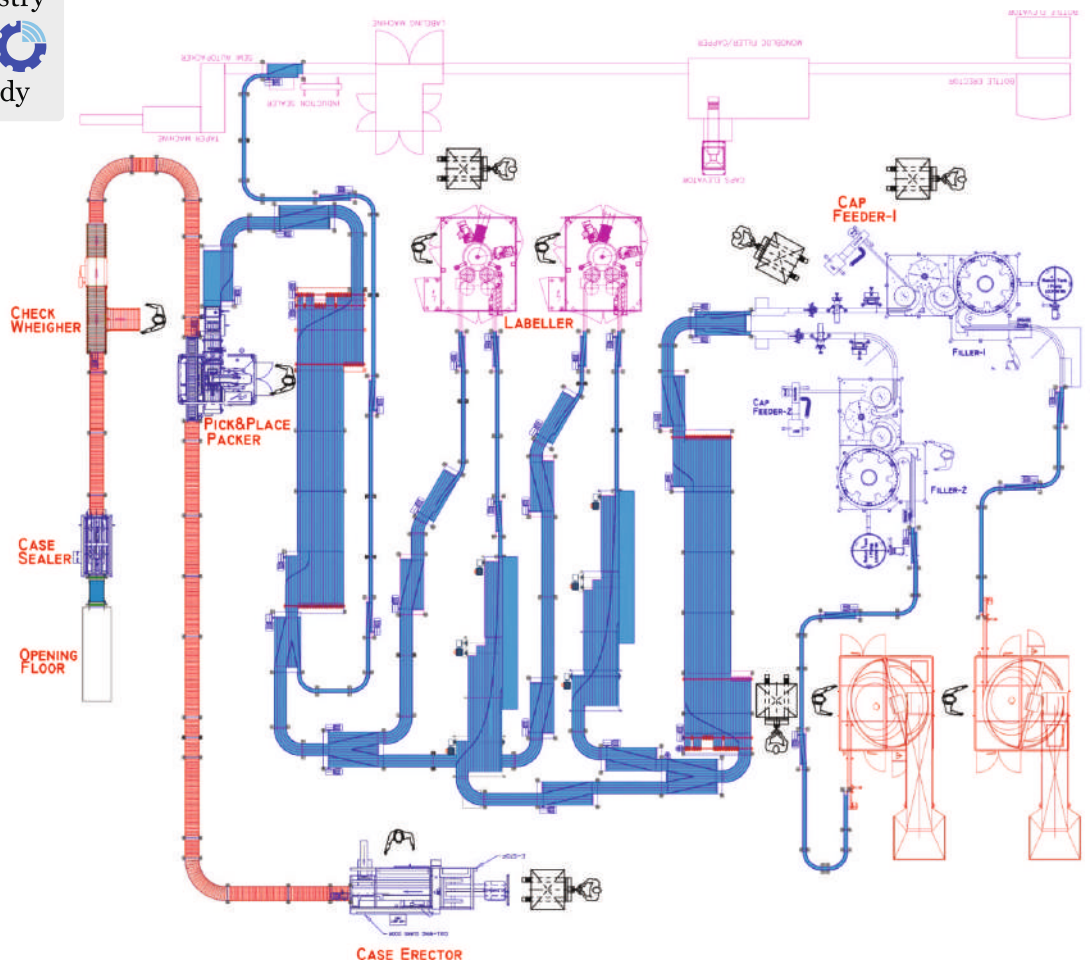

Clearpack has proven capabilities to provide its customers with turnkey packaging solutions.

Our team of project managers and engineers undertake all the activities right from concept to commissioning. A turnkey project typically begins with understanding of your stated and unstated needs, detailed layout of the project followed by equipment support, complete integration, testing, personnel training and documentation, to conclude with successful running.

We can also provide efficiency improvement solutions to help you monitor and improve the productivity of your line on a real-time basis on your mobile or laptop

Our aim is to execute projects at optimal cost to enhance ROI for our customers.

Industry
4.0
Ready

Automated Guided Vehicles (AGV)

Ideal for repetitive tasks under conditions where humans don't operate with full efficiency

All Types of Navigation Systems

Navigation Technology: Magnetic Tape | QR Code | Laser | Natural Navigation

Type: Lurking | Carrying | Towing | Forklift

Inspection

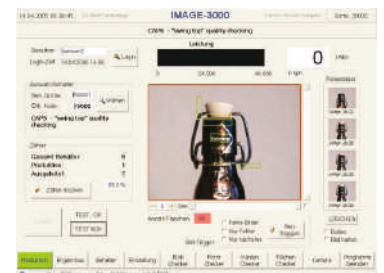

Monitoring and analysis of critical quality parameters

Vision Inspection

X-Ray Inspection

Metal Detection

For monitoring and analysis of all critical quality parameters you can rely on our highly advance inspection systems. With our wide range of solutions you can assure quality and avoid operational losses caused due re-packing.

Our Machines Deliver **Superior Performance**

Our Services Ensure They **Continue To Do So**

After sales supports is something that differentiates us.

With global presence and team of trained service engineers we aim to keep high 'up-time' for the machines we supply.

We provide local language documentation, preventive maintenance visits, AMC's, training to ensure that your machines, are always in good condition and production ready.

We continually invest in training our service engineers to be able to deliver under tight time constraints.

Why Choose Us

Single Source Responsibility

- Single point contact for PO & complete line execution, after sales services and spares, for technical upgrades.
- Leading to high efficiency, cost & time savings.

European Technology, Made in Asia

- Proven and Reliable European machines at Lower cost, better ROI
- Save capital without sacrificing reliability

Local Service & Spares Support

- Higher equipment uptime, better throughput
- Lower operation costs
- Backed by strong service team of local engineers at every site

Best-in-Class Focus

- Provides solutions at optimal cost through license manufacturing strategy
- Offer products from industry leading supplier-partners
- Vast packaging knowledge & industry experience available to our customers

Primary Packaging

Secondary Packaging

End-of-Line Packaging

Automated Guided Vehicle

Efficiency Improvement Solutions

“Customer Delight is Our Topmost Corporate Goal”

Be it supply of standalone machine or a complex integrated turnkey packaging line, we put our experience and engineering know-how to work for our customers.

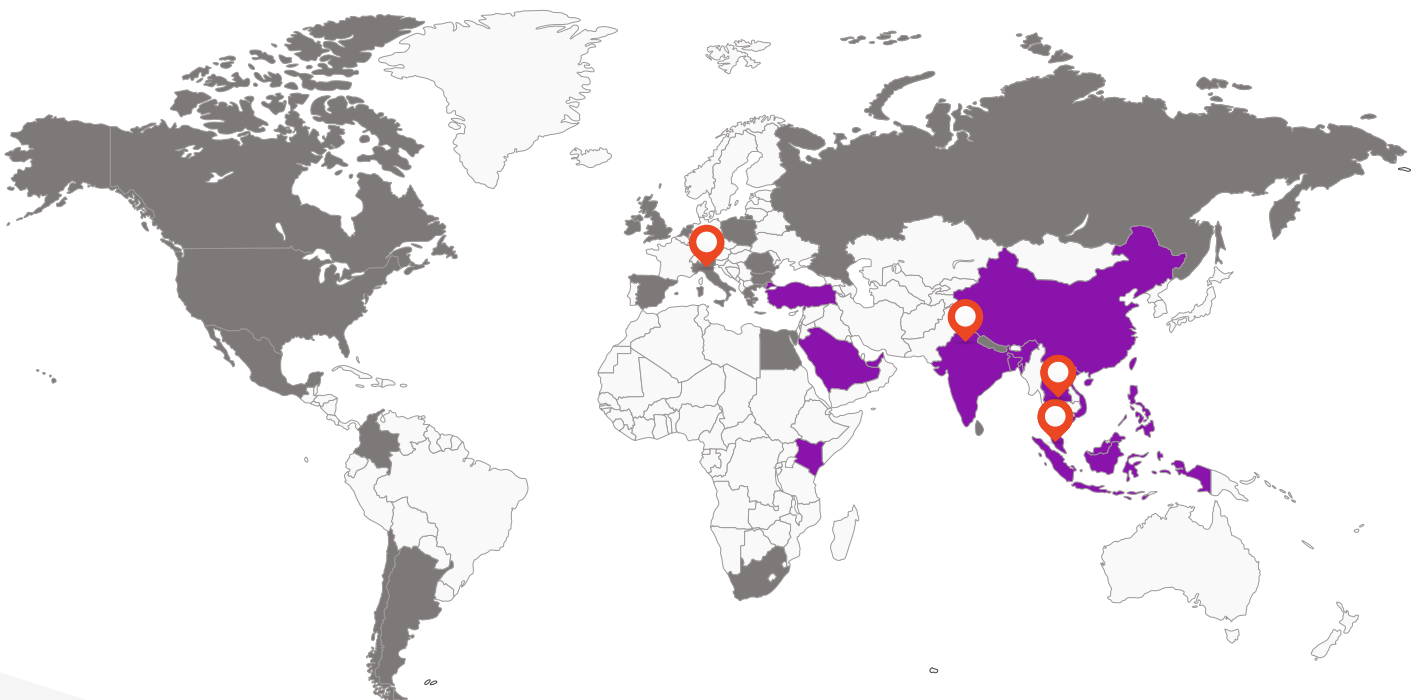

Over the last 30 years, we have installed and commissioned several hundred machines successfully across Asia, Middle East, Africa & Europe for various applications in Primary, Secondary and End of Line packaging.

We use our cumulative expertise and industry knowledge to solve your packaging problems and build innovative packaging solutions.
