

## High Barrier Mono Material Packaging Pouch

Keneng proudly introduces **Eco-Key**, our 100% recyclable flexible packaging solution designed for food, personal care, and home care products.

Manufactured with advanced high-barrier technology, Eco-Key matches the strength and performance of traditional multi-layer packaging while reducing carbon footprint through metal-free barriers instead of aluminium or foil.

### Why Choose Keneng Eco-Key?

- **Strong & durable:** Pouches stand upright with stiffness and smooth sealing edges.
- **Crystal clear transparency:** Products remain visible through packaging windows.
- **Tough protection:** Resistant to rough handling and damage.
- **Superior barrier:** Oxygen (OTR) and water vapor (WVTR) rates below 0.1 — equivalent to aluminium foil.

### Flexible Formats Available

- Roll Stock, Rewind, Film
- Stand-Up Pouches
- Box Pouches
- Side Gusset Bags
- Heavy-Weight Bags
- Spout Pouches
- Recyclable Retort Pouches

Eco-Key integrates seamlessly with existing equipment, requiring minimal adjustments — no costly new investments.
